WHO WE
ARE

WHO ARE WE

GreaterHeight is an IT Consulting, Business and Technology service provider, creating leading-edge Solutions and Services for Individuals, Organisations and Businesses throughout the world to help them succeed by turning them into a successful and high-

performing brands through the use of its resources, services and solutions. We have competencies in IT Consulting, Training & Expert Mentoring, Custom Software Development - web, desktop, cloud and devices.

WHY GREATERHEIGHT?

GreaterHeight expertise and competency cut across business, management, strategy, consulting and technology. Since our founding, we have carefully built a reputation for serious web design and development. So, if you are equally serious about your technology project, we can help you achieve the results you desire.

Your business success is the reason we exist, we are developer of things. GreaterHeight outperforms competitors by going extra miles in custom services, high-quality and efficient deliverables. With substantial improvements into the IT system, we help customers to bridge the challenges by integrating new technologies and industry best practices.

GreaterHeight as a professional company of industry, experts with exceptional experience leverage comprehensive intelligence system across diverse industries and domains, tools, platforms, technologies, combined skills, knowledge and experiences of its knowledge workers and industry partnership to deliver the next generation, high innovative Business and IT Services.

GreaterHeight Technologies metamorphosed from GreaterHeights Consulting founded in 1999, GreaterHeight Technologies headquarters is in Lagos, Nigeria with consultants around the world. Because we live and breathe out core values, mission and purpose, we have recorded 80% client retention. Our stakeholders rely on us for innovative solutions, expertise and services in Web, Mobility, Cloud, Open Source frameworks, and IT Consulting.

We understand that your business must keep pace with the speed of thought and we believe that your ideas and enterprises deserve substantial reinvention. We address these changing needs of your business with solutions that are not only cost effective but also fast to deploy, highly scalable and reliable.

The unique point making our company stand out from hundreds of others is that 100% client satisfaction has been the highest priority we always stick to. Even more, we would be happy to become more than just a web site design company and a service provider always available to take care of your personal and business needs, but as navigator and guide, helping you out in the dynamically changing and growing world of web development and web site design.

COMMUNICATION

Information transfer from the Client to our team (and vice versa) is done using e-mail, chat, FTP and conference calls. In addition, clients are also sent weekly status reports of their projects keeping them abreast of all the latest developments.

NEAR TO THE GROUND COST

We strive to help our clients reduce the overall IT & Business project (solution) costs. We take care of not only cutting custom software development expenditures, but also the ones associated with technical support and maintenance. We offer transparent pricing that are at par with the industry standards.

PROJECT MANAGEMENT

Our expertise lies in knowledgeable and highly experienced team of Project managers, who are capable of handling the variety of projects at a time. We execute rigorous management controls to guarantee timely delivery with best quality.

QUALITY POLICY

GreaterHeight has a standard quality Policy across all the processes, internal communication and outcomes, we pay extra attention to the deliverables focusing on long-term excellence in projects.

FLEXIBLE DEVELOPMENT

After detailed discussion with clients, we handpick the best suited development method focusing on their requirements. This results into high quality software and solutions at an affordable cost and meeting strict deadlines.

DEVELOPMENT INFRASTRUCTURES

We have a state-of-the-art software development infrastructure for different platforms strategically located in Lagos. We have dedicated servers in US and UK to deploy Projects, latest computers with all the software needed to design and develop as per client's needs.

MANAGEMENT EXPERTISE

GreaterHeight is led by highly qualified management team with business savvy who bring with them several years of experience in the field of business consulting, web & software design and development.

TECHNICAL EXPERTISE

GreaterHeight's members have years of expertise developing customized in variety of industrial standards. The combination of our qualified experts with diverse technical skills and professional attitude can provide you with even the most difficult web and software solutions.

SECRECY AND SECURITY

In line with service level agreement with our clients and our internal policy of secrecy, GreaterHeight implement strong security planning to ensure seamless performance of critical business processes. Our employees are not allowed to share work-related information, data, and software to third parties without proper permission.

SPEED

We understand that your business must keep pace with the speed of thought and we believe that your ideas and enterprises deserve substantial reinvention. We pride ourselves in helping clients to integrate IT with business, this in most cases bring about quick delivery, performance and ROI.

QUALIFIES TECHNICAL RESOURCES

Technologies get outdated quickly, so we have structured to quickly adopt latest innovation & technology. We are very intuitive in integrating technology with existing systems and redefining business processes. We provide technology consulting, custom solutions and implementation of complete IT solutions to maximize performance.

OUR VALUES

eSMIRT

EXCELLENCE

We daily leverage our competencies – our abilities and capabilities - to do the best we can and maintain the highest operating standards (people, processes, environment, appearance, infrastructure, suppliers, financial, customer, compliance and risk metrics).

MENTORING

We teach, advise, counsel and disciple people by instructing, explaining, demonstrating and inspiring them to have deep understanding of subject matter.

RESPECT

We value the difference - belief, culture, thought pattern - in everyone we work with and treat them with dignity and courtesy.

SERVICE

As stewards, we use all our available resources to consult for individual, businesses and Organisations to help them maintain competitive edge and become successful, thereby making the earth a better place.

INNOVATION

We promote an innovative culture and attitude. We think differently and strive to apply innovative thinking and creativity to everything we do.

TRANSFORMATIONAL LEADERSHIP

We always make our actions inspiring to others to dream more, learn more, do more and then to become more.

OUR CORE PURPOSE

TO HELP PEOPLE AND
ORGANIZATIONS SUCCEED

OUR MISSION

“TO HELP MAKE INDIVIDUALS, ORGANIZATIONS
AND BUSINESSES THROUGHOUT THE WORLD
EXPERIENCE SUCCESS THROUGH THE USE OF OUR
RESOURCES, SERVICES AND SOLUTIONS”

BUSINESS & DELIVERY MODELS

Public-Private Partnership Model

In partnership with Government or any international body we use our agreed resources to finance, build and operate a government project that enables social justice, employment, poverty reduction, wealth creation, and good governance in the interest of the people.

Offsite Delivery Model

Extension of the customer's software engineering facility. The customer pays fixed monthly rate for the team.

Build-Operate Transfer Model

We Build facility and infrastructure for the client, Operate & customize it as per client's needs & when model reaches maturity, we Transfer the complete ownership of the facility & resources to the client.

Vendor Financing Model

GreaterHeight provides a service in which our projects are completely vendor financed, with investments recoverable on a subscription (or pay as you use) basis.

Social Responsibility Model

GreaterHeight not only provides Technology Solutions and services which aids in development, it further commits to social entrepreneurship by giving back to educational client institutions a percentage of its revenues for use as funds, grants, or scholarships

Build-Operate Transfer Model

We bring our project experts directly on your site through Co-Development Model. We put our skilled engineers on your premises to work in line with your in-house team from inception to execution.

BUSINESS DELIVERY MODEL

We understand that each business has its own set of needs and so does its work methodology. Amidst varied business structures, different target markets and potential customers, your requirements are bound to differ. So, how can one delivery or business model serve every industry and business?

GreaterHeight primarily focuses on integrating information technology with your business processes to enhance performance and returns. It is possible only by employing business acumen amalgamated with technical expertise in a manner that is distinct and carefully thought to suit your specific needs. This necessitates different delivery models.

Our pragmatic approach, business-driven strategies, and outcome- driven solutions help you to leverage technology with your business through varied delivery models.

PUBLIC - PRIVATE - PARTNERSHIP (PPP)

In partnership with Government or any international body we use our agreed resources to finance, build and operate a government social responsibility project that enables social Justice, Employment, Poverty Reduction, Wealth Creation and good governance in the interest of the people.

Our objective in this space is to provide effective technology and infrastructural solutions based on proven global technologies, allowing a cost-effective manner for the developing countries to enjoy the same efficiencies obtained in developed industrial economies.

ZERO COST/VENDOR FINANCING MODEL

GreaterHeight provides a service in which our projects are completely vendor financed, with investments recoverable on a subscription (or pay as you use) basis.

This model means that, unlike in the traditional software industry, our clients do not pay any upfront fees for the solutions we provide. Rather, the cost of the solution is borne by the users of our clients' products, spreading recovery costs over a long period of time and a large number of users. This is an innovative and valuable model for any emerging or established business or developing countries, which typically have limited ICT budgets and extensive ICT needs.

CO-DEVELOPMENT MODEL

Offering skilled personnel who work in continuous interaction with you. This is also referred to as Onsite Delivery, we bring our project experts directly on your site through Co-Development Delivery Model. We put our skilled personnel on your premises to work in line with your in-house team from inception to execution.

Our experts take your business to a whole new level by becoming a true business partner and a member of your team. They also provide the value-added services and technological expertise to meet your needs and expectations.

GreaterHeight provides the customers with unrivalled personal attention, to develop and implement solutions for various complexities. Suitable for all kinds of projects, big or small – Onsite Delivery Model is perfect where the scope of the project is repetitive and open-ended like most of the process reengineering related services.

Clients availing Onsite Delivery Models get added support as throughout the project, our consultant's report to an on-site project manager as well as, back to our offices regularly. We offer a plethora of services suiting your needs as well as, lesser time-to-market. At GreaterHeight, we work as your extended team and aim to add value to your business.

Avail several benefits with our On-Site Delivery models by interacting with the on-site personnel that enables us to get a clear understanding of your expectations. It gives you the much-needed peace of mind and desired results. This delivery model also reduces the risks of communication gap and offers minimum chances of amendment during the later stages. Additionally, this model reduces time-to-market involvement.

OFFSITE DELIVERY MODEL

Achieving high-performance in supply chain through flexible delivery models

Give your business the GreaterHeight edge with Offsite Delivery Model. Designed to suit your needs, our team of specialists are equipped with latest resources and exposure to the recent technologies and platforms. Irrespective of geographical backgrounds, there is a scope of regular face-to-face interaction which will give faster response time and clearer perception.

Give your business the GreaterHeight edge with Offsite Delivery Model. Designed to suit your needs, our team of specialists are equipped with latest resources and exposure to the recent technologies and platforms. Besides, this delivery model ensures low cost with high quality services and solutions.

After the initial onsite interaction with clients including studying, understanding and finalizing their requirements for scope of work, the entire project delivery team is managed at our office in Lagos, Nigeria. Clients get regular project updates for a clear understanding on their projects' status and to resolve any of their queries, that too without extra expenses. If you're expecting a series of projects with critical delivery to achieve your business objectives within affordable costs, Offsite

Delivery Model is the best possible option. Our development centers act as dedicated unit, offering client's specific requirements for the best possible solutions.

At GreaterHeight, we work as your extended team and aim to add value to your business. Our commitment to global clients enables us to provide sustainable solutions along with various business interests and needs.

Get the benefit of reduced costs with high quality work which will eventually be reflected in the overall cost of the project. With no additional expenses, you can complete your business achievement without worrying about the resources. Even the difference in time zone acts as an advantage to our clients. We understand the importance of time and with offsite delivery model, we can improve your turnover time by almost 50%. Get sizable productivity as our schedules ensure that we have team working on your project round the clock.

Our extensive offsite service database ensures our customers that their functional requirements are delivered at the most competitive prices. If you are looking for a globally accepted project development with risk-free project co-ordination management and communication, GreaterHeight is the most preferred choice.

SOCIAL RESPONSIBILITY

GreaterHeight is proud of her deep sense of social responsibility and is motivated by an awareness of the context in which our Company operates. Our Company was founded out of a commitment to influence and reshape the future of people, businesses, organisations and nations throughout the world, and our business plan is informed by the kind of social responsibility required to expeditiously move these entities into the digital.

age. SOCIAL RESPONSIBILITY The heart of our social commitment and our main business objective are one and the same: to provide effective software solutions to the developing world. GreaterHeight not only provides Technology Solutions and services which aids in development, it further commits to social entrepreneurship by giving back to educational client institutions a percentage of its revenues for use as funds, grants, or scholarships.

PARTNERSHIP MODEL

Partnership at GreaterHeight is nurtured on mutual trust, shared risks and profits with ambitious goals. Increase revenue, create brand and expand your reach with us. We understand that building strategic and sustainable solution is a joint effort and we like to involve businesses of all sizes. We have alliances with some of the internationally acclaimed businesses, and offer a non-competitive environment to all our partners so that we can thrive mutually as well as individual.

Why Partner with us?

- Global clientele

In addition to several business support, we also help you with training and development so that you always remain ahead of the competition. Through long-term relationships, stable business principles and core-expertise, we can benefit mutually to thrive in this competitive age.

PRICING MODEL

GreaterHeight understands that pricing plays a key role when deciding on your service providers. To help our clients with affordable rates, we strive constantly to optimize our flexible pricing models. Our pricing framework revolves on several factors which are responsible for pricing maturity with satisfied outcomes. To support our clients, we have a set of transparent pricing strategies coupled with a combination of 'right' elements which are at par with the industry standards.

At GreaterHeight, our experts define realistic pattern for your advantage. After thorough coordination and analysis, we chart out the requirements and develop the scope of work and estimated time required to complete the job. However, depending on the task, time taken to deliver may reduce or extend and that will be notified to the client. In whichever case, customers are kept duly informed and updated with all the developments, current status, and reports. Cent percent transparency is ensured with the client while performing the task. Besides, you can add or

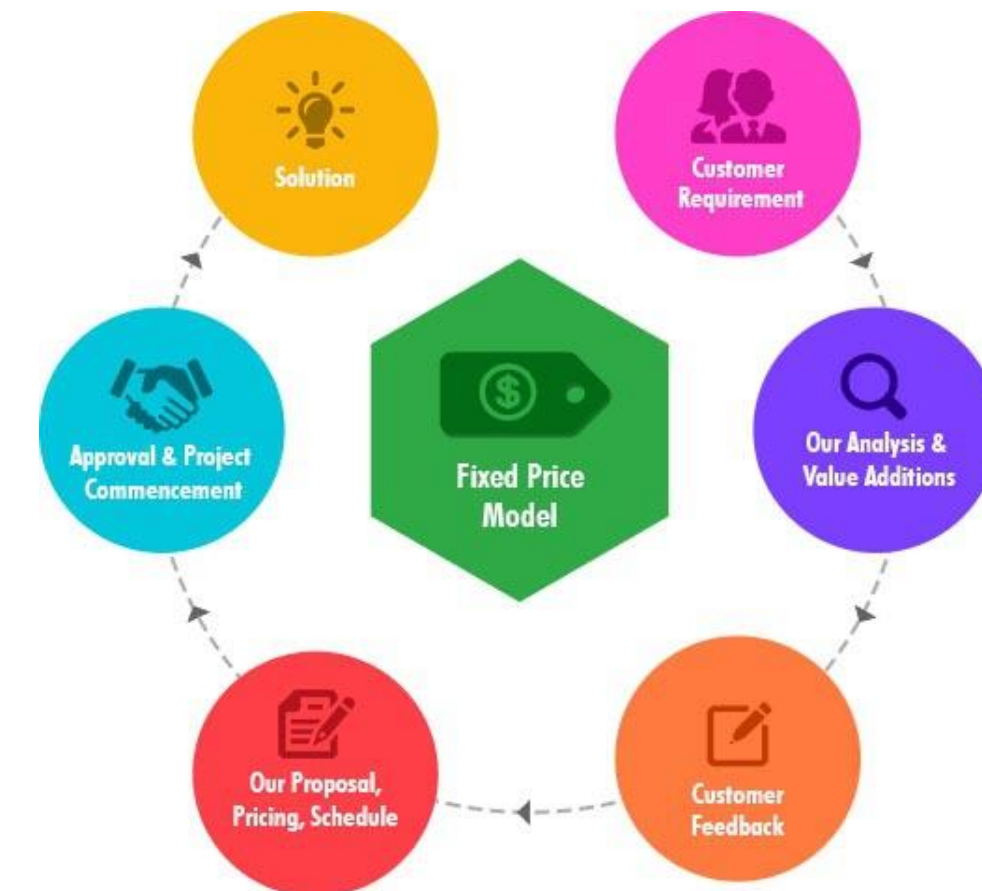

reduce the number of resources based on your needs and only pay for the specified work completed.

In this model, clients have greater control over the project, and there is minimal risk involved. The best advantage of this model over others is that it offers immense transparency and opportunities to build more trust between both the parties.

Fixed Price Partner

Get to know the exact estimation and time about your project

Reap maximum rewards with GreaterHeight' Fixed Price Model that enables you to define projects with dynamic plan, priorities and execution. With our best R&D team we address your business's varied needs across diverse industries and verticals.

Time and Material Partner

Ensuring you pay for the time we put in your project

When the scope of work is not predetermined and there is no time estimation to complete the task, Time and Material Pricing Models is an apt choice. This model allows you to pay for the number of hours for which the work is done and the amount of work accomplished. It is a wise decision to go ahead with this model if you have no clue about the required time and scope of work.

Considered ideal for projects with defined requirements and execution methodology, this pricing model gives both, the customers and service providers much needed peace of mind. This model allows a clear understanding of the project including, the development process, timelines, resources needed, risks and other related factors. Fixed price model, also known as, Lump Sum model requires strict adherence of deadlines as the service provider endures the risks involved in the project however, it allows clients to set an exact budget quite in advance. This gives the customers on the other hand, much more security and peace of mind as far as the pricing is concerned.

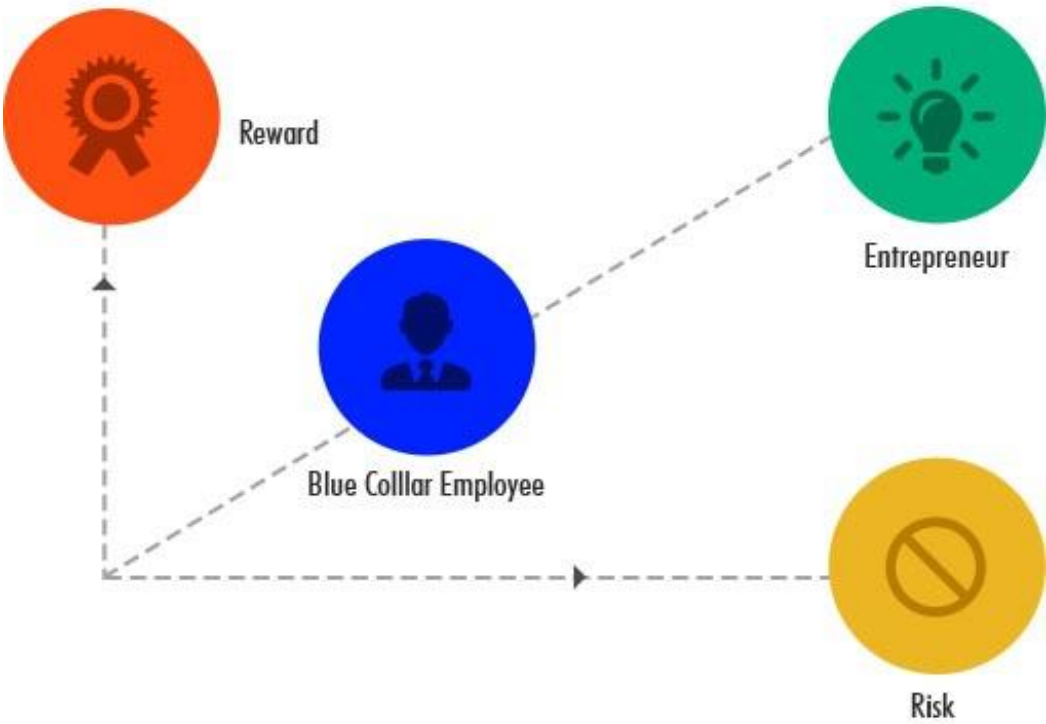

Irrespective of the factors, this pricing model gives both, the service provider and the customers a host of benefits. At GreaterHeight, we give our clients utmost importance with flexibility and clarity. Our cost effective fixed price model allows customers to enjoy better and more robust delivery. We update them on a regular basis about the status of the projects aided with excellent communication and escalation mechanisms.

Risk Reward Pricing

Making stronger business relationship with a lasting impact of pricing

GreaterHeight strive continuously to give our global clientele maximum results at affordable costs. Keeping that in mind, we also practice Risk-Reward Pricing Model which acts as a settlement between two extreme pricing models. This flexible pricing approach enables both, the customer and the service provider with mutual risks and benefits of a particular project.

Risk Reward Pricing Model has a flat rate pricing structure where additional payments depend on specified end results. This new strategy in the market is usually implemented where the clients and the service providers mutually fund the development of any product or service. A recent favourite among the customers and service providers alike, this new pricing model helps both the parties to share the rewards.

All the parties agree to monitor the project's success and evaluate the end result using a standard set of metrics applicable to everyone involved equally. GreaterHeight with Risk Reward Pricing Model allows the customers to supervise a project unitedly as a joint venture. This also makes the relationship with our clients stronger with a lasting impact.

DESIGN AND CREATIVE SERVICE

Spin Attractive **Web Design** For Productive and Prolific Results!

Let us create a striking and stunning Creative Web Design for Gratifying Returns

Let us **Create**
Design

Appealing visuals tells your brand's story. Book covers, brochures, web pages, logos, graphic designs or just a humble visiting card - when designed well, these speak volumes for your brand. Our clients across industries always benefits through visual mediums, like, crisp colours and expert creativity to attract customers and strengthen brand loyalty, instantly.

CORPORATE IDENTITY DESIGN

Your corporate identity is the identity by which your business, its ethics, way of working and brand are known. It is a combination of fonts, colours, shapes, figures and other aspects that come together to create one design. This design may have many versions as it is used on various communication media including letterheads, business cards, newsletters and so on. In fact, corporate identity design involves logo design, brochure design, stationery design and even design of your packaging.

BRAND STYLE GUIDES

It is not always easy for businesses to maintain consistency in their branding efforts. But, from a customer's point of view, consistency is pivotal to brand retention. When your logo, brand name, newsletters, stationery, banners, advertisements and all other marketing communication incorporate the same colours, shapes, fonts and styles, it creates a consistent brand image that customers can easily recall. Consistent branding is effective branding, leading to greater identity and brand recall.

MULTIMEDIA PRESENTATION DESIGN

Interactive multimedia presentations have revolutionized the task of promoting business news and events. Presenting information about your business, promotions, offers, achievements and other events to your customers no longer needs to be through the use of long pages of text. In fact, plain text can result in potential and existing customers simply overlooking the information you present because they're not engaging enough.

COLLATERAL DESIGN

Collateral marketing and advertising is central to becoming a brand that your customers remember at all times. Being the first name that your customers recall when the need arises requires you to create a physical and online presence that is hard to miss and easy to remember. This calls for effective branding and innovative collateral advertising designs such as those offered by GreaterHeight.

Design for Gratifying Returns

UI & UX DEVELOPMENT

UI / UX designs for software applications have moved on from the traditional vanilla designs to swanky designs that are an integral and complex part of any software application.

BANNER DESIGNING

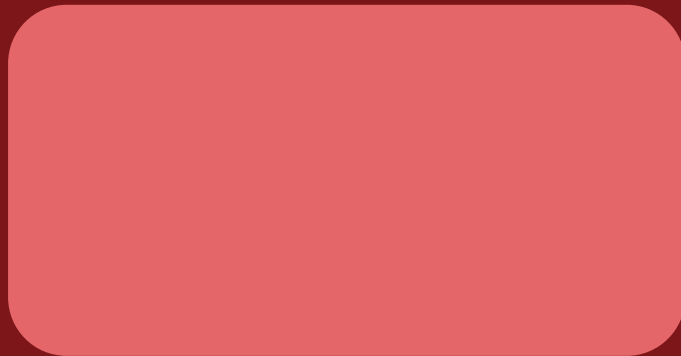

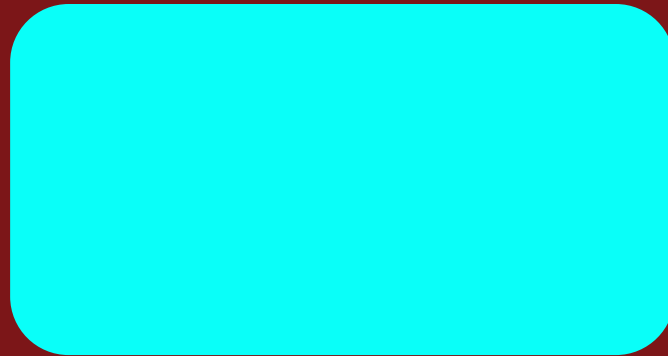

Depending on how it's used, a banner is either a graphic image that announces the name or identity of a site (and often is spread across the width of the Web page

LOGO AND BRAND DESIGN

Your logo is the single most important visual tool which serves as a reminder of everything that you are and can do. It is the face of your brand and your identity.

CONTENT DEVELOPMENT

We have expert mentors and trainers available that can impart and help individuals, teams and any corporate

BROCHURE DESIGNING

You can use a brochure for many purposes - advertising of new promotions or products, informing customers of changes in your business or strategies, attaining new customers by spreading information about you and your business, branding and marketing and even meeting competition by maintaining a wider reach.

ENTERPRISE MOBILITY SOLUTIONS

**Connecting the Enterprise to People and
Control assets from any location.**

Mobility solutions are a part of our lives today as the boundaries between personal and professional, home and office disappear. With reduction in cost of mobility infrastructure more than one third of global workforce is slated to become mobile enabled. We believe that in the coming decade mobile solution will be one of the key drivers for business innovation within organizations. Enterprises will find new ways to

communicate and engage with employees, partner and channel and end consumers.

Some of the early adopters have already built applications for building customer loyalty, increasing sales through location-based discount coupons or providing mobile commerce and payments, insurance to create a sustainable competitive advantage.

MOBILITY CONSULTING

Our Mobility Consulting brings years of first-hand mobility experience and expertise to help identify, plan and implement and innovative solutions in your organization.

MOBILE APPLICATION DESIGN AND DEVELOPMENT

There are more mobile devices than people on the planet, which cause fundamental transformation in human behaviour the way we utilize mobile /smart phones & tablets in day-to-day business these days. We help our client formulate Mobile Strategies, Mobile BI and closely consult with firms, companies and business owners to positively affect their organizations.

MOBILE ANALYTICS

Mobile is far different and more effective for sales than the desktop and laptop. It is unique in that it is totally personal. It belongs to one owner and travels with its owner. We help our client get insight information from the mobile device into the patterns and habits of that particular person.

ENTERPRISE MOBILITY STRATEGY

There are more mobile devices than people on the planet, which cause fundamental transformation in human behaviour the way we utilize mobile/ smart phones & tablets in day-to-day business these days. We help our client formulate Mobile Strategies, Mobile BI and closely consult with firms, companies and business owners to positively affect their organizations.

MOBILE TESTING

We have a dedicated team of experts in Mobile testing with extensive experience. We understand the process of testing the functionality, usability and consistency of an application for hand-held/mobile devices, tablets and smart phones.

CampusPorch College Management System is a feature-rich, multilingual, complete College Portal. CampusPorch portal provides state-of-the-art online interactive community and backend administration functions. The school intranet effectively brings the education stakeholders (management, administration, parents, teachers and students) together on a common interactive platform thereby fostering camaraderie among them and building a solid school community. Built using the latest technology, this scalable online College management software automates a school's diverse operations such as System Administration and Management, Records and Profiles Management, Timetable Generation and Updates, Substitute Management, Fee Management, Attendance Management, Exam Management, Grades Management, Library Management, Web Community Management, Online Content Management and Homework Management.

The school community portal is marked by numerous useful features such as school calendar, events, notice board, polls, forums, profile search and internal mail, to name a few.

This online College Management system also includes a whole range of activities such as incorporating different rules of an education system and taking care of diverse needs coming from different standards emerging in education such as boards, grades, government standards and compliances, to name a few.

This fully browser-based College management system software can be conveniently accessed from both school intranet and public internet. Yet another advantage of this education management system software is that it runs on minimal hardware and can easily be customized to fit in the budget of any College. Main modules of CampusPorch – College Management System are related to:

SECURITY

Role Management Module, Advanced account locking, Firewall

HealingBalm is an enterprise Hospital Information Management System (HIMS) that provides several management tools such as EMR, which is more of an audit trail of doctor's encounters with patients. EMR is a modern way of a hospital treating the patients. EMR covers past history, prescription suggested by doctors, opinion of distant consultants with the help of DICOM imaging or Tele-radiology. This means all vital information is residing in the system, which can be readily retrieved to help in making a timely decision.

REGISTRATION & ENQUIRY MANAGEMENT

This application has a comprehensive approach toward handling efficiently the front desk pressure without much effort and very effectively manages the patient registration, appointment scheduling and all enquiries related to taking an appointment, availability of specialist doctors and info on the admitted patients.

APPOINTMENT AND QUEUE MANAGEMENT

Appointments & Queue management scheduling module facilitates effective scheduling of appointments of patients with the doctors. This module allows doctors and nurses to view available time slots and allocate appointments accordingly. This module prevents the system from creating an appointment if the doctor is on leave or absent or busy in the OT.

CASUALTY & EMERGENCY MANAGEMENT

HMIS has inbuilt feature in this module to serve the emergency patients instantly. It takes the patient from the arrival point in the casualty to the transfer to a department in the hospital for further treatments. This module has facility to send alerts to the corresponding departments, captures all the relevant data on patient's condition at the time of arrival, course of action undertaken

PHARMACY MANAGEMENT

The Drug Information System or Pharmacy Management System; HMIS offers this as integrated module to manage drug dispensing, their stock management and also control functions of a proper pharmacy outlet in a hospital. This module receives the prescriptions from the consulting doctors and reflects automatically into dispensing unit to a respective patient.

OPERATION THEATRE MANAGEMENT

Operation Room or Theatre module offers an optimum usage and tracks all surgeries that can take place in the hospital. Right from scheduling the operation, managing the surgery team, recording the surgery details to checklists associated with a surgery.

LABORATORY INFORMATION SYSTEM

The Laboratory Information system module is used by the pathology lab to record and disseminate the information regarding the tests performed. The Laboratory Department receives online request from doctors and also allows laboratory personnel to generate requests.

NURSING AND WARDS MANAGEMENT

HMIS has a range of modules all integrated seamlessly to rid of any redundancies in the system. The ward management module offers the windows to nursing or Ward staffs and facilitates them to manage their wards on a floor. Special units like ICU and OT are practically and effectively managed and tracks all services given to a patient connecting their wards.

BED CENSUS MANAGEMENT

The Bed census management module maintains the record of bed occupancy status at all times. It facilitates the estimation of appropriate waiting times for patients and avoids unnecessary empty beds. It helps the Healthcare organization in reducing the bed turnover time which is very essential for optimization of the revenues.

BLOOD BANK MANAGEMENT

The Blood Bank Management is quite tricky issue for any hospital. HMIS supports all the functionalities of a Blood Bank, which includes right from receiving requisitions for blood, Stock management and issuing blood.

SERVICE ORDER PROCESSING AND BILLING

The Service Order Processing and Billing module is used to process the orders prescribed by the clinicians or other staff in real time. This is called e-prescribing of services or e-prescription. These orders are populated in their concerned departments after passing the process of billing. These services are billed on the concerned billing counters depending upon the category of the patient. (ie. General, Insured, Guest, Staff, etc.). CPT codes are used to denote the services provided within the Healthcare Organization.

AMBULANCE SERVICES MANAGEMENT

This module helps to manage the ambulance services provided by the Healthcare Organization. This module keeps track of the ambulances available for service and also manages ambulances services ordered from external vendors. This module helps you manage the Scheduled as well as the emergency services of the ambulance. It also helps you maintain the basic life support facilities provided in the ambulance if any. The availability of ambulances and drivers are better managed using this module.

FINANCIAL ACCOUNTING SYSTEM

One of generic however most important is "Finance & Accounts" module deals with entire exercise of maintaining the accounting practices and ensures that no double data entry is required to create all important reports and yet fulfils all statutory of the country. This module covers all features from all expenses, all incomes, purchases, ledgers and other books of accounts as per standard practice while maintaining users' data security.

TPA AND INSURANCE MANAGEMENT

The latest challenge for any hospital is to manage Third Party Administration (TPA) and cashless Insurance Management. In the HMIS application, we have taken care of all this and offer to integrate the insurance companies billing module with ours in order to process the settlement of the bills of a patient insured or covered. It helps in verifying the eligibility of a patient for reimbursement purposes and saves all stake holders from many hassles.

QUALITY ASSURANCE AND MONITORING

This module is used to monitor and control the quality of care provided to the patients. It is used to manage the infection control practices. It is used to record the number of incidences that exploit the healthcare quality and helps to employ methods to control such incidences. It helps in deploying methods to improve the quality of care provided to the patients. It helps in setting up the policies and procedures to check the quality of processes in the hospital.

STORES AND INVENTORY MANAGEMENT

The stores and inventory management help you keep track of each and every item consumed within the healthcare organization. It keeps track of the sales and purchases taking place within the healthcare organization. The consumable as well as non-consumable items are identified and accounted for. Provision for FIFO and LIFO management of the inventory items. Online purchase requests from various stores in the healthcare organization to the warehouse of the Healthcare Organization. Receiving quotations and issuing purchase orders to various vendors.

PATIENT REFERRAL SYSTEM

The patient referral system facilitates the referral of a patient to other Healthcare Organizations for further management. This module identifies the need for referral and provides a list of Healthcare Organizations to which the patient can be referred. The Clinical details of the patients can be communicated to those hospitals by using the HL7 messages. It also manages the means of transportation of the patient to those hospitals and identifies revenue generation for referral if applicable.

PAYROLL AND HR MANAGEMENT (OPTIONAL)

Besides managing the clinical records of a hospital, HMIS is pretty strong generic modules such as HR/Payroll. It is integrated with other modules and obviates the need of double data entry for creating salaries of various staff members. It automatically tracks from Duty Roster Management. This module is quite modern in terms of features and facilities. The salient features are listed below.

DUTY ROSTER MANAGEMENT SYSTEM

Deployment of human resource has always been a challenge to any hospital. Many innovative channels are deployed to handle such challenges and many IT companies have come up with various software products to manage this as standalone product. In such scenario the HMIS's Duty Roster Module offers as an integrated feature to manage duty of various staff.

PHYSIOTHERAPY AND REHABILITATION

The Physiotherapy and rehabilitation Module provides the physiotherapist to maintain the physiotherapy schedules of the patient manage the physiotherapy sessions and keep record of the therapies provided to a particular patient. It also helps in estimating the relevant progress of the patient's health status and has the ability to chart the improvement of a patient over a period of time.

DIETARY MANAGEMENT

The dietary management module provides assistance to the hospital kitchen in providing meals to inpatients as per the instructions of the dietician. The module facilitates the dietician to prescribe a diet as instructed by the physician to any given patient. The module also allows the maintenance of meal scheduling, customizing meals as per patient meals and recording of individual meal orders.

CENTRAL STERILE SUPPLY DEPARTMENT

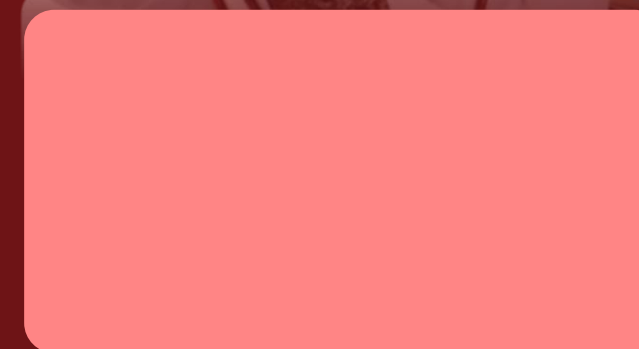

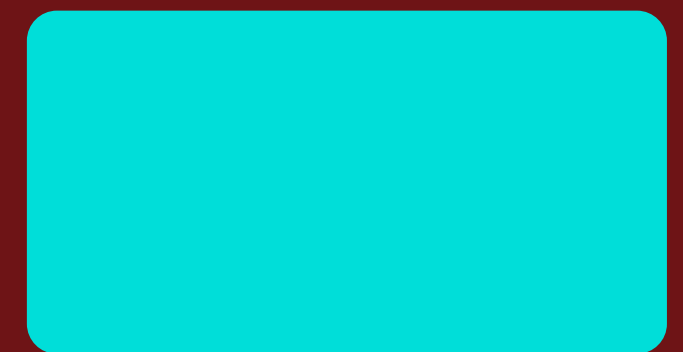

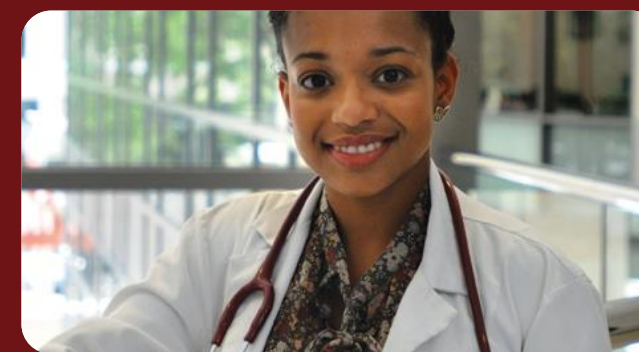

The Central Sterile Supply Department's (CSSD) main function is to provide sterile items, linen, equipment to ward's and OT's. The CSSD receives reusable equipment; linen from various OT's and wards for sterilization and performs the sterilization of these equipment, linen, etc. Further it stores these equipment, linen, etc and dispenses it as and when required by various departments.

HOUSEKEEPING AND LAUNDRY MANAGEMENT

The Housekeeping and Laundry Management module provides the facility to manage and monitor the housekeeping activities in a hospital. This module facilitates and keeps track of the house keeping activities like patient room preparation, sweeping/ mopping floors, dusting furniture, cleaning fixtures/ walls/ windows/ ceiling/ bathrooms, etc.

BIOMEDICAL WASTE MANAGEMENT

The Bio-Medical waste management protocol module keeps track of the collection and disposal of Bio-medical waste produced in the Healthcare Organization. This module helps in defining, identifying and categorizing the waste produced within the healthcare organization into different categories including the radioactive waste materials.

MANAGEMENT INFORMATION SYSTEM (MIS)

The management Information System (MIS) module provides information relating to the performance of the different departments of the hospital. It provides reports to the management unit for analysis of the effectiveness of various functions performed within the organization. It provides statistical tools for the analysis of data and supports the decision-making process of the management.

TELEMEDICINE COMPATIBILITY

Telemedicine is a field of healthcare IT which deals with the communication of health-related information of a patient between two or more remote healthcare entities. This health-related information of a patient may be communicated in the form of online video chatting, simple text messages, digital or DICOM images, audio visual films or any other digital form of data.

VEHICLE TRACKING SYSTEM

GreaterHeight's GPS based vehicle tracking and fleet monitoring and management system, VTracking, focuses on fleet tracking and monitoring needs of fleet owners, distribution companies etc. in diverse segment of industries segment. Fleet monitoring, transportation and school buses segments.

GreaterHeight's on premise VTracking application is the apt choice for industries where there is a wide geographical spread of vehicles which cater to daily activities and where the primary focus areas are the monitoring, configuring and tracking of those vehicles.

VTracking Features

REALTIME TRACKING

Realtime tracking gives an immediate outlook of driver's speed, odometer reading, ignition status, and driver location on a geographical map outlay.

GEOFENCING - IN/OUT

Geofence allows you bound-restrict your vehicles or a particular set of vehicles to a certain geographical boundary, you will get alerts should such vehicles go outside such predefined locations.

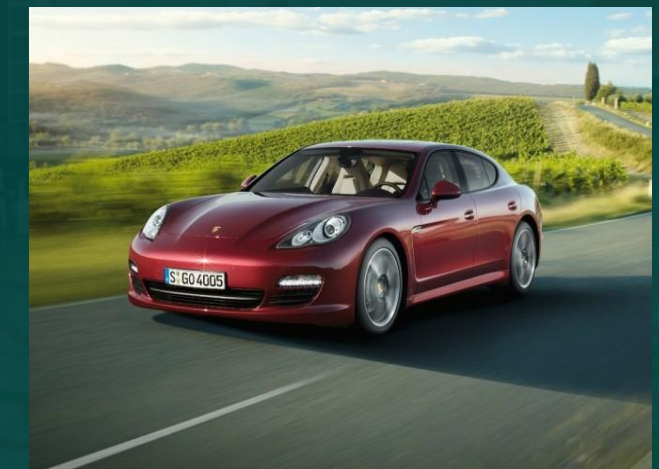

MISUSE & THEFT PREVENTION

Because of these you are able to set when and if your vehicles go outside a set predefined location, our solution most ideal in the case of theft.

MULTIPLE ALERTS NOTIFICATIONS

Battery disconnect, No data transmission, Over speed, Ignition on-off

- REPLAY TRACKING
- MULTI LOCATION, MULTI DIMENSIONAL
- REMOTE SHUTDOWN
- INTEGRATION WITH OTHER SYSTEMS
- IMPROVED VEHICLE SECURITY
- VEHICLE CONTROL AUTHORIZATION
- MULTI VEHICLE MAP VIEWING
- ACCIDENT SENSING DETECTION

CertificatePlus⁺

CertificatePlus® is a fully automated online certificate ordering service that is tailored to fit each institution's unique policies and procedures including service options, fees and school colors and logo.

CertificatePlus offers a secured, compliant and easy to use certificate ordering solution at little or no cost to you. CertificatePlus from GreaterHeight is a robust collection of features and services are available for you to mix and match to fit your exact situation. We can customize or automate as much as you desire, the features are designed to make Certificate Request the easiest part of your day.

Some Features
